PROFILE

Social, empathetic, cooperative, adaptable, team-oriented, eager for professional progress and personal development, persevering, detail-oriented, perfectionist, fast-paced worker, open to learning new things, respectful, capable of supporting my point of view with relevant arguments, continuously learning about subjects that captivate me (non-formal education), highly self-taught, keen observational skills, capable of taking on responsibilities.

VOLUNTEERING

Python Developer

"Oportunities and Careers" Association

November - Present

- Developed and implemented over 20 web scraping scripts, primarily using Python, requests and BeautifulSoup4 adding 100+ new jobs daily to the peviitor.ro search engine.
- I integrated scrapers into a continuous integration (CI) system using Github actions for automated operations. This ensures the quality of data by running the scrapers on a daily basis.

PROJECTS

Python | HTML5 | CSS3 | JavaScript | MySQL

Electronical Catalogue

It's a user-friendly web application designed to enhance parent-teacher communication and foster academic transparency for rural school communities. It provides real-time access to students' grades and attendance records, ensuring parents can stay informed and engaged in their child's educational journey.

Python

Real-time weather forecast

It's a program that provides real-time weather information for any city in the world using data from an API. This program allows users to input a city name, and it fetches and displays the current weather conditions, including temperature, humidity, a weather description for that city and what you should wear.
